> The Harvest of the Head.--When the comb acts as a rake, bringing away a roll of parted fibers every time it passes through the hair, baidness would soon be inevitable. But even in this case, forlorn as it may seem, the mischief can be arrested, the loss repaired. Lyon's Kathairon, aided by a brisk application of the brush to promote the absorption of the fluid by the scalp, will stop the thinning out process in forty-eight hours. The roots from which the dead filaments were shed will soon be re-endowed with vitality, and a new growth will speedily spring up on the denuded places. This work of reproduction will go on until the damage is completely repaired, and the luxuriant crop of hair thus produced will never wither or fall out as long as the vitalizing application is continued. In his address before the American Medical Association at Philadelphia, Dr. D. W. Yandell, the President, placed the question of the admission of the practice of medicine, upon the basis of "demand and supply," with the doctrines of political economy. If there is a demand for female physicians that want must be supplied, and unless such demand exists, it is useless for a woman to attempt to earn a livelihood as however, shows that in the treatment of certain classes, of diseases, particularly those of women and children, female have acquired great skill and experience and are consulted by persons who object to male physicians. Women are universall acknowledged to make the best nurse they not also be competent physicians The only difficulty is presented in the treatment of surgical cases, in the conduct of which women have not sufficient nerve to perform critical operations.

Queen Elizabeth.

This Queen, in spite of the representations of so many historians, was a wanton in morals, heartless in the cruelty of her disposition, and ugly in person. In her sixty-first year she was thus described. BRONCHITIS.

This is an irritation or inflammation of the bronchial tubes, which carry the air we breathe into the lungs. It arises from a cold settled in the throat, from estarric extending to these parts, from scrofulous affectious, and from severe use of the voice. The irritation from this latter cause com-mences in the larguz and glottis, which are the organs of the voice, and extending downwards, produces hoarseness, coughing and spitting mucous matter, sometimes mixed with blood. It is chiefly dangerous from its tendency to spread into the lungs, and terminate in consumption. It is in the cure of severe and obstinate cases of this isease that Dr. Pierce's Golden Medical Discovery has achieved unparableled sucwho have used it. It is sold by all respectable druggists.
